-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3723

1. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear as to the meaning of "closed ring". Is applicant attempting to define each of the ends as lying in a plane and is in the form of a continuous, uninterrupted ring? Appropriate clarification to the claims and specification must be made.

Claims 11-12 appear to be improperly dependent upon claim 1 since a pivot would prevent the limitation "the bit compartments extend in a direction of the longitudinal axis of the grip member" (claim 1) from being accurate. When the first end is pivoted relative to the second end, the bit compartments no longer extend in a direction of the longitudinal axis of the grip member. Additionally, with a pivot, the grip member would define plural axes and one end having plural movable axes.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent.

3. Claims 1, 4, 9 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Rowlay (6293173).

Rowlay discloses all of the claimed subject matter. Note that Rowlay discloses a "closed ring" as broadly claimed by applicant and as best understood. Applicant's attention is directed to paragraph 1, above.

Art Unit: 3723

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rowlay (6293173) in view of Leiser (EP 0 312 775).

Rowlay discloses all of the claimed subject matter except for having a flush or transparent sleeve. Leiser discloses a transparent sleeve "2" that is flush with adjoining parts of the grip. It would have been obvious to one having ordinary skill in the art to form the sleeve of Rowlay as flush with adjoining parts of the grip for ergonomics and comfort as taught by Leiser. It would have been obvious to one having ordinary skill in the art to form the sleeve of Rowlay as transparent to allow for the bits to be viewed when stored as taught by Leiser.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rowlay (6293173) in view of Huang.

Huang discloses a pivot joint below the lower end of bit storage areas. It would have been obvious to one having ordinary skill in the art to form the device of Rowlay with a pivot joint located below the lower end of bit storage areas to adjust the handle to various angles as taught by Huang.

7. Claims 2, 5-8, and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
